MESSAGE

The indiscriminate use of chemical pesticides and chemical fertilizer in our agriculture system has seriously effected in decline of our Agriculture produce, and animal and human health. It is therefore high time to minimize the use of these poisonous chemicals and develop some suitable alternative methods. The use of bio-pesticides, bio-agents and bio-fertilizers are now gaining momentum in our country.

In this context, I am happy to know that Doctor's Krishi Evam Bagwani Vikas Sanstha, Lucknow, envisages to bring out a bi-annual journal, "Journal of Eco-friendly Agriculture", which deals purely with organic farming management.

I appreciate the initiative taken by Dr. Srivastava, Chairman of the Sanstha, for bringing out this eco-friendly journal.

I wish all the best for the publication of this journal.

(Bal Ram Jakhar)
